

Setting sprays are used to fix make-up once applied. It is often used on each layer of make-up applied to bind the make-up together (for example the setting spray is applied after foundation, concealer and then blush to set each layer of make-up) so that the overall desired look is achieved.

Here at Nativis, we have developed a Body Mist that acts as an exceptionally good setting spray. It is 100% natural in composition, and contains a natural active ingredient derived from Sericin which we have called Silk Hydra-Fix©. This active ingredient leaves a highly effective moisturiser at the skins surface, but it also acts as a natural setting agent for Make-Up. Having no harsh ingredients (Alcohols or drying agents), it will cause no irritation with repeated regular use for setting purposes. It is also perfectly safe to use around the eyes, nose and mouth so full coverage of the facial region is easily achieved. Applied as a fine mist, it will provide a uniform and even coverage thereby providing a smooth and even outcome. It will provide a fresh and dewy finish with a final result that looks flawless. Further application of the setting spray during the day will freshen up the look and feel.

Products for Make-up Setting Mist

Silk Hydra-Fix Body Mist (200g)

Directions for Use - Apply and Let It Dry

1. Before applying the first layer of Make-Up, cover the face with the Body mist and leave to dry. This should take no more than a minute or two at most. After applying the first layer, repeat the application of the Body Mist and repeat this procedure until Make-Up application is completed. Apply a final spray once completed to give a dewy final finish.
2. Apply the Body Mist during the day as required to maintain a fresh look and feel.

Price £18.00

Use the above procedure for applying Make-Up so that it sets strongly and holds throughout the day. Apply further during the daytime as required to maintain the dewy, fresh look and feel. Perfectly safe to use around the eyes, nose and mouth.
